

# Audit Summary

**Project:** Test Sample, **Date:** 30.12.2025, **Scope:** 300 Keys, 10 screens

## Risk Snapshot

- **P1 (Blockers): 4** — LG-001, LG-002, LG-003, LG-005
- **P2 (Major): 4** — LG-004, LG-006, LG-007, LG-008

**Impact:** Highest risk is **directional flow errors** (stepper), **OTP failures** for Arabic-Indic digits, and **link/number corruption** in Arabic text due to missing isolation.

Fix First — P1 Blockers	Remaining Findings (P2)
<ul style="list-style-type: none"><li>• LG-001 · /auth/otp – input.otp-field - OTP rejects Arabic-Indic digits ٩–٠ <a href="#">/LG-001_P1.txt</a></li><li>• LG-002 · /checkout/payment – Stepper not mirrored <a href="#">/LG-002_P1.txt</a></li><li>• LG-003 · /signup · /checkout — name/address inputs — Fields reject Arabic letters due to ASCII-only rules (e.g., <code>^[A-Za-z ]+\$</code>) → users cannot complete account creation or billing/shipping. <a href="#">/LG-003_P1.txt</a></li><li>• LG-005 · /register – div.welcome - ICU placeholder changed <a href="#">/LG-005_P1.txt</a></li></ul>	<ul style="list-style-type: none"><li>• LG-004 · /settings/profile – h1 —appears on the wrong side, <a href="#">/LG-004_P2.txt</a></li><li>• LG-006 · /breadcrumbs – nav.breadcrumbs — order/dividers not mirrored <a href="#">/LG-006_P2.txt</a></li><li>• LG-007 · /profile – input.email — email field set <code>dir="rtl"</code> → caret jumps <a href="#">/LG-007_P2.txt</a></li><li>• LG-008 · /pricing – span.amount — currency code overlaps; numbers per Gulf/Levant locales, separators inconsistent <a href="#">/LG-008_P2.txt</a></li></ul>

## Next Steps

1. Implement **P1** (LG-001, LG-002, LG-003, LG-005), then **P2** (LG-004, LG-006, LG-007, LG-008).
2. Update the **Fix List** (Owner, PR link, Target Release).
3. Run the **RTL Self-Check** (inputs, chevrons, ICU, isolation).
